Professional Summary

B.Tech Computer Science and Business Systems student at Vellore Institute of Technology with hands-on experience building agentic AI and RAG pipelines using LangChain and LangGraph. Built a multi-agent research assistant that ingests multi-modal data (documents, video transcripts, OCR'd images) into a vector database and generates structured outputs, alongside experience in time-series forecasting, sensor-based recognition, and NLP. Comfortable owning AI systems end-to-end, from data ingestion to LLM-driven reasoning.

Education

Bachelor of Technology in Computer Science and Business Systems	2024 – 2028
Vellore Institute of Technology	CGPA: 8.65
Class XII — Ramsheth Thakur Public School	2023, 86%
Class X — Ramsheth Thakur Public School	2021, 98.6%

Technical Skills

Languages: Python, C++, SQL, JavaScript
AI/ML: Agentic AI, GenAI, RAG, LLM Orchestration, NLP, Transformers, Reinforcement Learning, Time-Series Forecasting, Prompt Engineering, Structured Outputs, LLM Evaluation
Frameworks & Tools: LangChain, LangGraph, Qdrant, React, Node.js, Express.js
Core Concepts: Data Structures & Algorithms, OOP, System Design, Full-Stack Development
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, GitHub Codespaces

Experience

GenAI & Agentic AI Development (Self-driven)	Last 3+ Months
- Designed and built multi-agent, retrieval-augmented AI systems using LangChain and LangGraph, orchestrating planning, routing, retrieval, and generation across specialized agents. - Implemented vector search pipelines with Qdrant, including document chunking, metadata extraction, dynamic query generation, and structured tool calling to improve retrieval accuracy and reduce hallucinations.	

Projects

NeuralNote — Agentic AI Research Assistant	<i>Python, LangChain, LangGraph, Qdrant, RAG</i>
- Built a multi-agent, retrieval-augmented research assistant that ingests, retrieves, and synthesizes knowledge from PDFs, blogs, Wikipedia, web pages, and YouTube videos into a unified knowledge base. - Designed a modular LangGraph agent architecture (planning, routing, ingestion, retrieval, and generation agents) that dynamically selects a processing path based on source type. - Integrated Qdrant for embedding-based semantic search, with dynamic query generation, document chunking, metadata extraction, and structured tool calling to improve contextual accuracy. - Added a YouTube pipeline that discovers relevant videos, transcribes them, and indexes the transcripts into the vector store alongside OCR-extracted text from images. - Auto-generates structured notes/documents from all ingested sources (text, video transcripts, and OCR'd images), consolidating multi-modal research into a single output.	
Artemis — AI Financial Compliance Analyzer	<i>Python, NLP, LLMs</i>
- Built an AI-powered compliance analysis system for intelligent document processing and contextual evaluation of financial documents. - Designed NLP pipelines for information extraction and automated compliance reasoning, integrating LLM-driven workflows to support decision-making.	
ShopTrack — Retail Forecasting Platform	<i>Python, ML, Time-Series</i>
- Built demand-forecasting workflows using machine learning and time-series modeling on historical transactional data. - Designed analytics dashboards to visualize forecasts and support inventory/demand decisions.	
Gesture Recognition System Using Sensors	<i>Python, Sensor Data</i>
Built a sensor-based gesture recognition system, processing real-time signal data with classification logic to translate raw sensor input into recognized gestures.	
DSA AI Interview Simulator	<i>Python, LangChain, LangGraph</i>
- Built an AI-driven mock interview platform that evaluates problem-solving responses with structured, LLM-based scoring. - Designed adaptive feedback pipelines that adjust follow-up questions based on candidate performance.	

Certifications

- Agentic AI** — IBM, via Adroit ProLearn Technologies (Certificate Code: TllcO0ic93)
- Complete Data Science, Machine Learning, DL, NLP Bootcamp** — Udemy, Krish Naik / KRISHAI Technologies (99 hours; Certificate No: UC-5f033e22-aa61-475f-adb4-831f263648a3)

Achievements

- Solved 400+ LeetCode problems demonstrating strong problem-solving skills.
- Hackathon Finalist (3x)
- JEE Percentile: 96.8
