EDUCATION

Vellore Institute of Technology, Vellore

Bachelor of Technology (Computer Science & Engineering)

CGPA: 9.14 / 10.00 | Expected Graduation: 2028

Sacred Heart Senior Secondary School, Sidhpur

Class XII: 92.75% | Class X: 98.80%

TECHNICAL SKILL

Programming: JavaScript, TypeScript, Java, Python, C, C++

Backend: Node.js, Express.js, REST APIs

Cloud & Infrastructure: AWS EC2, ECS, Lambda, API Gateway, S3, RDS, IAM, VPC, CloudFront, Cognito, EventBridge, SNS, SES, CloudWatch, Auto Scaling, CloudTrail

Data: PostgreSQL, MongoDB, Redis

DevOps: Docker, Git, GitHub Actions, CI/CD, Linux

Architecture: Apache Kafka, Microservices, Distributed Systems, Event-Driven Architecture, System Design

SELECTED ENGINEERING PROJECTS

[DESIGNNEST](#) | Cloud-Native Interior Design Consultation Platform

- Architected a production-inspired AWS application supporting secure authentication, AI-assisted recommendations, consultation workflows, and media management.
- Integrated EC2, RDS, S3, Lambda, CloudFront, Cognito, SNS, and SES into a scalable cloud-native architecture following AWS Well-Architected principles.
- Developed RESTful backend services with emphasis on scalability, availability, and secure API design.

[WEATHER PLATFORM](#) | CI/CD & Cloud Deployment

- Built an automated software delivery pipeline using GitHub Actions and Docker for continuous integration and deployment.
- Implemented CloudFront-based content delivery and deployment automation to improve reliability, introduce caching and reduce manual release effort.

[ARTEMIS](#) | Distributed Data Ingestion & Normalization Platform

- Designed and implemented a distributed ingestion platform for processing high-volume CSV datasets and audio-based customer feedback.
- Developed asynchronous processing workflows with Redis-backed caching and MongoDB persistence to improve throughput and preprocessing efficiency.
- Containerized backend services using Docker and deployed them on Amazon ECS, enabling scalable, repeatable cloud-native deployments.

CERTIFICATIONS

- [AWS Certified Solutions Architect](#) – Associate (SAA-C03) | Valid: 2026–2029

ACHIEVEMENTS

- Solved 200+ LeetCode problems covering data structures and algorithms.
- 3× Hackathon Finalist.
- Built multiple cloud-native applications demonstrating AWS architecture, DevOps practices, and distributed systems concepts.
